

# POWER ADAPTOR & HEATING ELEMENT FOR HBS SWITCHES

## HBPA - a unique Power Supply

The HBPA Power Adaptor with high voltage protection/isolation designed for switching solenoid valves. Main supply: 90 to 240V AC, switch output max. 0.25A AC. Protection class IP65.

## HBHE - a matchless Heating Element

The HBHE Heating Element is a recommended accessory for switches used in low temperature applications (below -30 deg.C (-22 deg.F)). By fitting the heater onto the HBS switch the build up of ice on the sensor is avoided.
